## Harness Cord

The stability of the degree of elongation of Harness when hanging leads to the improvement of the work efficiency.

Our Braided Harness Cord are manufactured exclusive of high tenacity polyester.

### Some other characteristics:

- Elongation: Heat setting equipment from latest technology to ensure the best dimensional stability.
- High Abrasion Performance.
- Soft, smooth and braided construction protects harness board.
- Strong Antistatic properties with special chemical additives.
- According to genuine application of the products, the following products can be provided according to customers requisite.
  - Available with or without core.
  - Available with or without carbon.
  - Available in different colours.
  - Available in different sizes.

Item Name	Diameter	Meters Per Kg
MT - 386	0.60	2200
MTC - 386	0.60	2150
MT - 411	0.70	2100
MTC - 411	0.70	2000
MT - 436	0.75	1750
MTC - 436	0.75	1700
MT - 486	0.80	1600
MTC - 486	0.80	1550

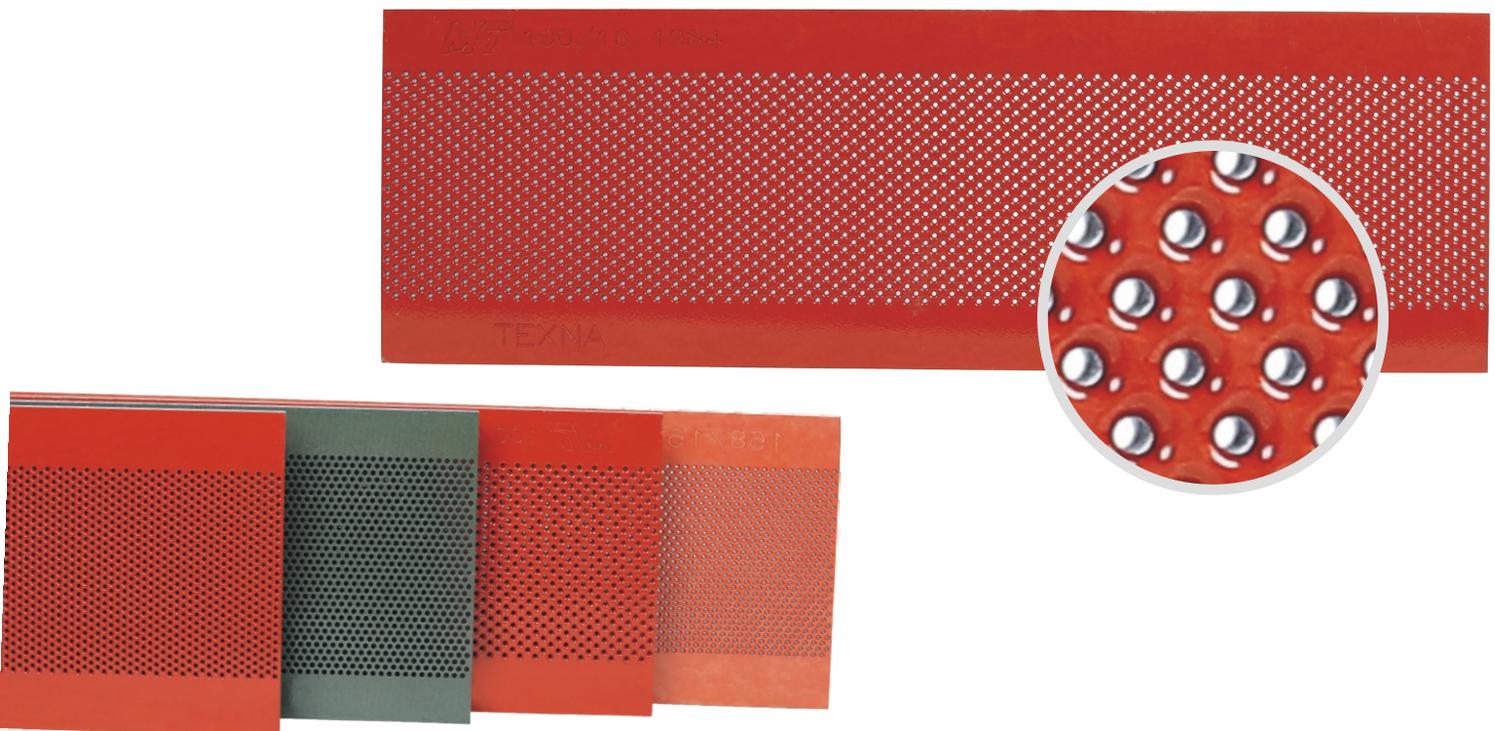

## Standard Colours

## Comber Board

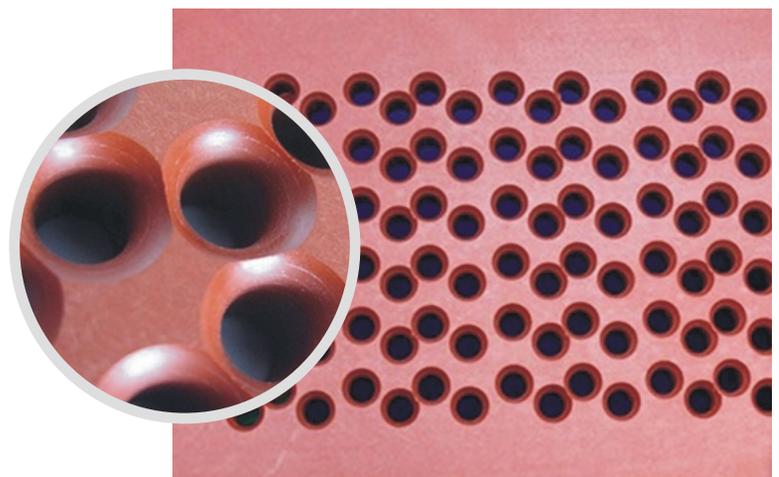

We have been operating manufacturing business that main of Comber Boards (Imported- Multi Layer and Homogeneous). We offer the comber board in different colours such as red, pink & Green.

By the special processing, the surface and the both side of the hole is radiant and possible be used with the low friction. Extra hard coating for surface protection We also design comber board and guiding board as per consumer requirement.

## Guiding Board

We are presenting a superior range of Guiding Board. These products are made by our professionals, who have years of skill in this field. Additionally, this product is manufactured at our end.

## About Us

MAKWANA TEXTILE is a sister concern of well known "Makwana Group of Industries" having more than 55 years of experience in machine designing & manufacturing. MAKWANA ENGINEERING WORKS is parent company established in 1965 by late Shree M.M.Makwana and sons for manufacturing and supplying work shop machineries like Pillar and Radial drill to several domestic and international markets.

During the past 55 years the company has made tremendous progress through technological up-gradation from time to time and has introduced different new machineries in the market and has established the following Industries.

Makwana Engineering Works

Makson Machines Pvt. Ltd.

Kishor Machine tools

M-tech Machine tools

Makwana Manufacturing Company

Makwana Plastomech Pvt. Ltd.

The growth and expansion of above companies inspired the group to go ahead for the establishment of its new venture Makwana Textile for the manufacturing and exporting of Comber Board, Guiding Board, Harness Cord, Healds & Springs.

Makwana Textile is Located at Plot no.144 ,Chitra , GIDC, in Bhavnagar connected by Road, Railways and by Air from Mumbai(Bombay).It's hardly 7 to 9 km distance Bhavnagar city and Bhavnagar airport. The mega city Ahmedabad is Only 180 Km.

## R & D Department

We have a well maintained research and development department equipped with sophisticated instruments & equipment's as per with international standards for developing new products. Our R & D department conducts vigorous performance test prior to the launch of the new products in the market.

## Committed Delivery Time

Our well settled work force including qualified and experienced Engineers and highly skilled technical staffs are always very keen to complete the production in the scheduled time and help us to stand always punctual in committed delivery time.

## Technology

We have keep researching and developing our products, and currently we manufacture the products that meet the requirements of each weaving machine, pursuing a reduction of the friction and a high accuracy & are excellent in strength, abrasion resistance, adiabaticity, compressive, and electrical resistance property. Processed by in-house developed CNC & Braiding machines.

## Quality Control

Makwana textile always believes in quality products with excellent performance and long reliability. our qualified and experienced engineers and highly skilled technical staffs are always taking care of the quality in every stage of the production process starting right from the selection of raw materials, processing, and all till the developed product.
